- Docker
- Jenkins

Daniel Eduardo Ramirez Villegas

A passionate, hands-on professional, I am over 6 years' experience in software development.

I have great skills in areas related to software development due to my past experience working as a .NET and Java developer. I am also highly proficient in C/C++ and JavaScript programming.

I am interested in Software Engineering and due to this interest I am constantly looking for information and trying to put into practice.

I am happy working independently or in a close team environment, and apply a positive attitude to every task I undertake.

Experiencia

Smartmatic
Caracas, Venezuela
Ciudad de Panamá, Panamá

Currently

Software Engineer

As member of Electoral Solutions Department, I had been involved in multiple projects for electoral events in Venezuela, Argentina, Philippines, and Uganda among others in different company products.

I have worked as a Java developer for server side applications as well as a C/C++ developer for client side platform.

MediCitas
